Long Overdue Victory for Emergency Contraception Access

Obama Administration Announces Plan to make Plan B One-Step Available OTC for All Women

Washington, DC -- Statement by Susannah Baruch, Interim President & CEO of the Reproductive Health Technologies Project, on the submission of a plan by the **Obama Administration to make Plan B One-Step available over the counter without age or point of sale restrictions.**

"This victory is long overdue! We are now one giant step closer to the day when Plan B will be available on store shelves to all women.

We finally see light at the end of the tunnel in our decade-long fight to give all women access to a safe, reliable, back-up contraceptive option.

We will continue to hold the Administration accountable in ensuring that all emergency contraception products, including generics, are available over the counter without age restrictions."

#

Emergency contraception is a safe, effective back-up method of birth control that can prevent pregnancy in the first few days after unprotected sex or contraceptive failure. For more information about emergency contraception, please visit RHTP's website [here](#).

Susannah Baruch, Interim President & CEO, Reproductive Health Technologies Project is available for interview upon request.
